Q. The committee commented that the real issue comes down to having a viable school district with good facilities and how that impacts property values. Let your school facilities go down and see what that does to your property values – the loss in property values will far exceed the increase in property taxes that would have been incurred if the bond issue had been passed. The community is just beginning to hear about the district's long term planning effort and how building capacities are beginning to be exceeded by enrollment growth. They need to have a clear understanding of the need or they will not trust the recommendations being made.

12. Anyone who would like a tour of the high school during the school day should email Jim Ratcliff (ratcliffj@laketravis.txed.net) with best dates and times for them to tour and Jim will set up the tour and email the rest of the committee members should any others want to join the tour.

The next Bond Advisory Committee meeting will be on April 21st at 6:00 PM in the board room at the Administration Building.
